

GAYATHRI MENON

gayathri.menon.2006@gmail.com | Delhi, India | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Ambitious second-year undergraduate student in Electrical and Computer Science Engineering with hands-on experience developing projects in artificial intelligence, computer vision, speech processing, and frontend development. Passionate about applying technical skills to solve real-world technology challenges. A proactive learner with strong communication, teamwork, and multitasking abilities, seeking an internship to further develop technical expertise and contribute to innovative technology solutions.

EDUCATION

BTech, Electrical and Computer Science Engineering

Current CGPA: 8.3 / 10.0

Vellore Institute of Technology | 2nd Year | Expected Graduation: July 2028

TECHNICAL SKILLS

Languages: Python, Java, C, R, MATLAB, SQL

AI & Machine Learning: Machine Learning, Deep Learning, Computer Vision, Speech Processing, AI Model Development

Frontend Development: HTML, CSS, JavaScript, React, UI/UX Design, Responsive Web Design

Tools & Platforms: Git & GitHub, OpenCV, IBM WatsonX, Figma, VS Code, MongoDB

Design: Graphic Design, UI/UX Prototyping

PROJECTS

Notevera AI — AI-Powered Note Assistant | [GitHub](#)

- Built an AI-driven note-taking assistant that auto-summarizes, tags, and organizes notes using NLP and transformer-based models.
- Designed a conversational interface for natural-language note querying with a responsive frontend in HTML, CSS, and JavaScript.
- Tech stack: Python, transformer models, HTML/CSS/JS.

SonicClear — Real-Time Speech Enhancement System | [GitHub](#)

- Developed a real-time noise-cancellation system using DSP and deep learning (spectral gating + neural noise suppression).
- Built a low-latency streaming audio pipeline in Python using librosa and PyTorch; applicable to transcription and accessibility tools.

Campboard — College Application Assistance Platform

- Built a full-stack web platform using React, MongoDB, and Azure that delivers personalised college recommendations and student reviews.
- Implemented a semi-automated form-filling system to reduce application effort; designed with a responsive, user-friendly interface.

Mental Health AI Chatbot (Ongoing) | [GitHub](#)

- Co-developing an empathetic AI chatbot using transformer-based NLP for mental health support, with crisis detection and resource redirection.
- Stack: Python, React; actively training the model on mental health conversation datasets through open-source collaboration.

EXPERIENCE

Creative Design Intern — Spectov Startup

Jan 2026 – Jul 2026

- Produced social media graphics, UI mockups, and brand assets using Canva and Figma; maintained visual consistency across all digital deliverables.
- Collaborated with cross-functional teams to iterate on designs under deadlines, incorporating stakeholder feedback to meet business objectives.

CERTIFICATIONS

- IBM Generative AI Using IBM WatsonX — Prompt engineering, foundation models, and enterprise GenAI application development.
- Frontend Development Certification — Coursera | HTML5, CSS3, JavaScript, responsive design.
- Data Analytics Certification — DeepLearning.AI / Coursera | EDA, statistical analysis, Python, foundational ML.
- Google Solution Challenge Participant — Built solutions for UN SDGs; applied design thinking in a global student competition.
